They have many other duties in addition to recording the PONC tests for the club. **They are not required nor expected** to take photos of all dogs. If exhibitors or others want to ensure that photos are taken of their dog(s) during tests weekend, please designate a person to use a cell phone or other recording device. The Water Rescue Test

The NCA Water Tests are a series of exercises designed to develop and demonstrate the abilities of purebred Newfoundland dogs in an aquatic environment. NCA water tests demonstrate natural ability and skills acquired through training, and emphasize teamwork between dog and handler in simulated work and rescue situations. The ideal working relationship is a balance of controlled performance and natural independence. Dogs should display not only efficiency in accomplishing their tasks, but also willingness and enjoyment in their work.

Dogs Eligible to Compete:

The NCA Water Rescue Tests will be open to purebred Newfoundland dogs at least six (6) months of age. The word 'dog' in the NCA Water Rescue Test Regulations refers to either sex. All entered dogs must have an AKC/CKC registration number, AKC ILP/PAL number, foreign registration number, or AKC or foreign litter number.

BITCHES IN SEASON may participate in NCA Water Rescue Tests. Bitches in season will be tested at the end of the competition after all male dogs are judged. When not being tested, bitches in season must be contained in a designated area well away from male dogs and the official test areas.

DOGS NOT BEING TESTED AT THE TIME are not permitted in the official Test Areas.

UNENTERED DOGS (except bitches in season) are welcome to join us at the test site. Please remember that all unentered dogs must remain well away from the main test area during judging so as not to disturb any competing dogs.

Site Description:

The test is held in a portion of Pymatuning State Park made up of approximately 10 acres adjacent to the Dam. Included are two beaches, a wooded area, a park pavilion, and a large grassy area. The woods are within 60 feet of the water's edge on the left side of the site and within 30-40 feet on the right side of the site. The test site has a sand and gravel beach approximately 80 feet wide and 10-15 feet deep with a grassy area between the beach and woods. Water depth increases gradually as you move in to the lake. The lakebed slopes from left to right as you face the lake and is mostly sand and rock near shore, changing to rocks or mud 20-30 feet from shore. At normal water levels, dogs begin to swim 15-20 feet from shore on the left and 10-15 feet from shore on the right of the site. The water becomes cloudy as dogs enter but quickly clears. The site has experienced strong breezes in the past, usually blowing left to right, but occasionally swinging directly to shore. Very strong winds have produced white cap waves of 3-12 inches in height.

COVID GUIDELINES:

All participants will be required to sign a Covid-19 waiver, for each day of the test, assuming all risks related to potential exposure to Covid -19. If you have a fever, are not feeling well or have had contact with a known Covid-19 positive individual within 48 hours of the test, we ask that you contact the test secretary immediately and do not attend the test. We will be following the State of Pennsylvania and any Federal guidelines. Please note these guidelines are subject to change and are provided on current local, state and federal Department of Public Health Guidelines. You will be informed of any changes as the test date approaches.
